

Tips For Creating Your Slides

- You don't need to crate a title/holding slide – This will be designed for you by us.
- Limit the number of slides you use being concise is key but also avoid densely pack text on slides.
- Avoid using all uppercase or lowercase lettering.
- If using hashtags please differentiate words with a captail where apporiate (e.g. #WomenInTechWorldSeries).
- Don't make it word heavy include plenty of photos, graphics and charts to back up your messages.
- Keep high contrast between the colour of text and imagery.
- Keep graphics & figures as simple as possible

Requirements

- Please refer to the speaker FAQ for details of your specific format.
- Please ensure any videos are embedded within the presentation.
- Please submit a first draft look of your slides by month, day – Feedback will be provided within 48 hours.
- Please upload your final presentation slides by month, day – [Here](#)
- Please note that we will **not** be accepting any slides onsite.
- All presented content will be subject to final approval by Ascend Global Media.

Mastering Public Speaking In Tech

Glossophobia

Glossophobia

“The fear of public speaking is essentially the fear of being eaten! Because audiences look like lions, presenters feel like gazelles.”

– Deborah Frances-White
Charisma Versus Stage Fright | TEDx Cambridge University

Why bother?

Developer Advocate @ Elastic

 Carly Richmond blogs at <https://carlyrichmond.com/blog-home/>
Summary

Carly is a Developer Advocate at Elastic, based in London, UK. Before joining Elastic in 2022, she spent over 10 years working as a technologist at a large investment bank, specialising in Frontend Web development and agility. Outside of work, she is an agile evangelist, UI enthusiast, and regular blogger on her personal site and Medium, as well as occasionally here on InfoQ. When she is not chatting tech, she also loves cooking, photography and drinking copious amounts of tea.

About this Publication

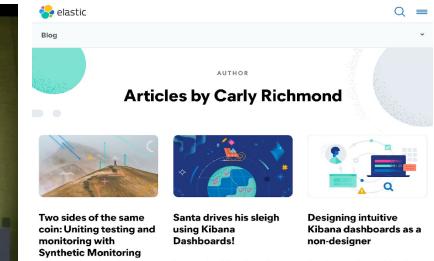

How do we start sprinting effectively? We all appreciate the support given by experienced individuals when we start our own Agile journey. However, when we transition to a team of guiders, how we begin to deliver quality software every iteration, or even resetting an existing team with bad habits, is a well-known construct. Here I intend to regale the tale of orchestrating my first Sprint 0 to reset an existing team, and the various twists and turns through Sprint 0 and onwards to our first effective review.

Synthetic Monitoring and E2E Testing - 2 Sides of the Same Coin
